Persistent Pain – a Paradigm Shift

Tuesday, 1st October 2019

6.00pm – 7.00pm

Light refreshments provided between 5.30pm – 6.00pm

Hervey Bay RSL

11 Torquay Road

Pialba Qld 4655

Dr David Johnson of City to Coast Neurosurgery and director of The Back Pain and Functional Movement Training Centre will discuss how his team manages the growing epidemic and leading cause of worldwide disability – low back pain, by implementing a paradigm shift, "cause based approach". Controlling symptoms in conjunction with eliminating the disease of movement dysfunction, which causes the symptoms of low back pain.

Dr Johnson will highlight his model of pain science utilised daily in his clinical practice, which helps his patients understand and achieve autonomy to progressively and definitively recover from chronic low back pain and prevent acute low back pain from progressing to chronicity.

About Dr David Johnson

Dr Johnson is a brain and spinal neurosurgeon practicing at St Andrew's War Memorial Hospital. He has had a pioneering role in the establishment of multidisciplinary spinal practices and holistic care for neurosurgical patients.

Dr Johnson's expertise covers a wide range of brain and spinal neurosurgery including low back, sacro-iliac and neck pain management, minimally invasive keyhole techniques, neuro-oncology, acute cerebro-vascular surgery, brain and spine trauma, trigeminal neuralgia, pituitary surgery, CSF diversion surgery and pain neurostimulation surgery. Since 2014 Functional Movement Therapy has become integral to his spine pain practice.
