

# WHOOPING COUGH VACCINATION MATTERS.

## Whooping cough vaccination during pregnancy:

- The most effective way to protect baby against life-threatening whooping cough
- Safe for mother and baby
- Protects babies until they are old enough to be vaccinated (from six weeks)
- Free for women in their third trimester (preferably between 28 and 32 weeks)
- Needed during each pregnancy

**Book in your third trimester  
vaccination now.**

**VACCINATION MATTERS.**
