

Information Sheet

Stakeholder Survey

Have your say & help us plan better services!

Why we are engaging

Central Queensland, Wide Bay, Sunshine Coast Primary Health Network (the PHN) is currently collecting information from organisations and providers as part of the health needs assessment process used to plan health services for the region.

The purpose of the survey is to better understand the current strengths and challenges of the health system, and health needs of clients and their families.

We are interested in hearing from those of you who work in the health sector or any other sectors regularly working with vulnerable and/or disadvantaged populations. This will assist us in gathering a holistic picture of our communities' health needs. The PHN along with its partners will use this information provided to better identify health priorities for the region.

How to participate

Have your say by completing the [online](#) community survey. Visit www.ourphn.org.au/survey to go to the survey link. The questions will take you about 15-20 minutes to answer. Your responses will be completely anonymous.

All participants will be invited to enter the draw to **win** a \$200 grocery vouchers!

Survey closes 28 February 2021.

Privacy and confidentiality

We will not be able to identify you from your responses. Any data collected as part of this study, including contact information provided for the prize draw, will be stored anonymously and securely.

To maintain the anonymity of your responses, you will be directed to a separate link for the prize draw to provide your contact details so that your contact details will not be connected to your responses.

Results

All data will be presented as aggregate. The results of the survey will be on the Primary Health Network website at: <https://www.ourphn.org.au>

About the PHN

Central Queensland, Wide Bay, Sunshine Coast Primary Health Network (the PHN) is an independent not-for-profit health organisation. We work with local communities, doctors and other health professionals to achieve the best health possible for our people.
